SCALE 1:100,000

Information on this map was derived from USGS DLG files out of the State Geographic Information Database (SGID) from the Automated Geographic Reference Center (AGRC) at 1:100,000 scale - ownership, roads, hydrography, federal boundaries, county boundaries. The ownership data was then rectified to the Trust Land Administration's (TLA) 1:24,000 PLS data (section lines taken from USGS DLG files), USFS GFF files and internally digitized data. Trust Land surface ownership was then edited and mineral ownership was added by TLA, ownership of less than a section is approximate. Official and detailed information is available through TLA and AGRC. Contour line data was derived from USGS DEM files at 1:250,000 scale (3 arc second) and generated into 200 foot contour intervals. Information shown at a smaller scale than its source scale may not be accurate and is for reference only.
